

# Table 6: Distribution of Federal Pell Grant Recipients by Family Income and Type and Control of Institution

---

Table 6A: *Total*

Table 6B: *Dependent*

Table 6C: *Independent*

---

Tables 6A, 6B, and 6C provide the distribution of recipients by family income and type and control of institution for all recipients, dependents and independents. These tables support the conclusions on differences in the distribution of recipients across institutions and EFCs discussed for Table 5. Figure 10 summarizes the distribution of recipients by income and type and control of school.

**Higher Income Recipients More Likely to Attend 4 Year Schools.** As income increased, recipients were more likely to attend 4-year institutions and less likely to attend 2-year and proprietary institutions.

**P** Recipients with family income of \$6,000 or less comprise 33.8 percent of the total. However, only 30.2 percent of those enrolled in 4-year institutions are in the \$6,000 or less group. Recipients enrolled in 2-year schools account for 35.4 percent of the \$6,000 or less income group. A higher percentage (42.4 percent) of those attending proprietary schools are in the \$6,000 or less income category.

**P** The pattern is reversed for recipients from families with incomes over \$15,000. While those with high incomes are 36.2 percent of the recipient population, they make up more than 42.1 percent of 4-year enrollees, 32.3 percent of 2-year enrollees, and 25.6 percent of those attending proprietary schools.

**Enrollment Patterns Vary by Dependency Status and Family Income.** Table 6B and 6C show differences in the distribution of dependent and independent recipients by type and control of institution and family income.

**P** About 24.2 percent of dependents enrolled in proprietary schools earn \$6,000 or less; 49.5 percent of independents at 4-year schools (both public and private) and 42.5 percent at 2-year schools, earned \$6,000 or less.

**P** Low-income dependents were also more frequent at proprietary schools, where those with incomes up to \$6,000 comprised 24.2 percent of the total. By comparison, 18.8 percent of dependents at 2-year institutions and 1.0 percent at 4-year institutions were in this low-income category.

**Figure 10:** Type and Control of Institution by Family Income
